PORTABLE DIESEL STORAGE AND DISPENSING SOLUTIONS

AVAILABLE FROM 200-900 LITRES

BUILT ON LEADERSHIP

Energy Storage Solutions

Kingspan Titan is an Energy Storage Solutions provider whose mission is to preserve and protect the environment by providing safe and absolute containment of expensive and harmful liquids.

Operating in over 90 countries, we offer a global distribution network of experienced sales and technical teams who provide a full range of focused customer service - including delivery scheduling, consultancy and installation guidance. Kingspan Titan also gives you the confidence of support over the lifetime of your product and beyond.

More than that, we power businesses and lives through total peace of mind.

Kingspan Titan

For over 40 years, Kingspan Titan has designed and manufactured innovative ways to store, dispense and protect AdBlue®, diesel and oil. We pioneered the world's first environmentally responsible bunded tank, leading change in our sector, and setting industry standards around the world.

As established global market leaders, our diverse range of innovative and environmentally responsible steel and plastic storage solutions offer dispensing and management systems in capacities ranging from 200 to 100,000 litres - ideal for a wide variety of industrial, agricultural, road haulage, mining, manufacturing, and construction applications.

TruckMaster®

Kingspan Titan TruckMaster®

The Kingspan Titan TruckMaster range has been specifically designed for the safe transportation of diesel fuel. Whether you are in the Agricultural, Construction or Forestry sector the lightweight, robust, portable TruckMaster offers users the ultimate convenience by allowing them to refuel remotely on-site.

Available in four capacities from 200-900 litres, the TruckMaster is built from high quality polyethylene providing resistance to structural damage, changing weather conditions and UV radiation. It also offers a range of dispensing equipment options for almost any type of user.

ADR Approved

The 430 and 900 litre TruckMaster has been tested to meet the requirements of the European Agreement (ADR) for the international Carriage of Dangerous Goods by Road. TruckMaster 200 and 300 litres do not require ADR approval under ADR exemption 1.13.1 c. due to their smaller capacity.

The Kingspan Titan TruckMaster range offers a quality, cost saving and compliant solution backed by excellent technical and customer service support for total peace of mind.

QUALITY

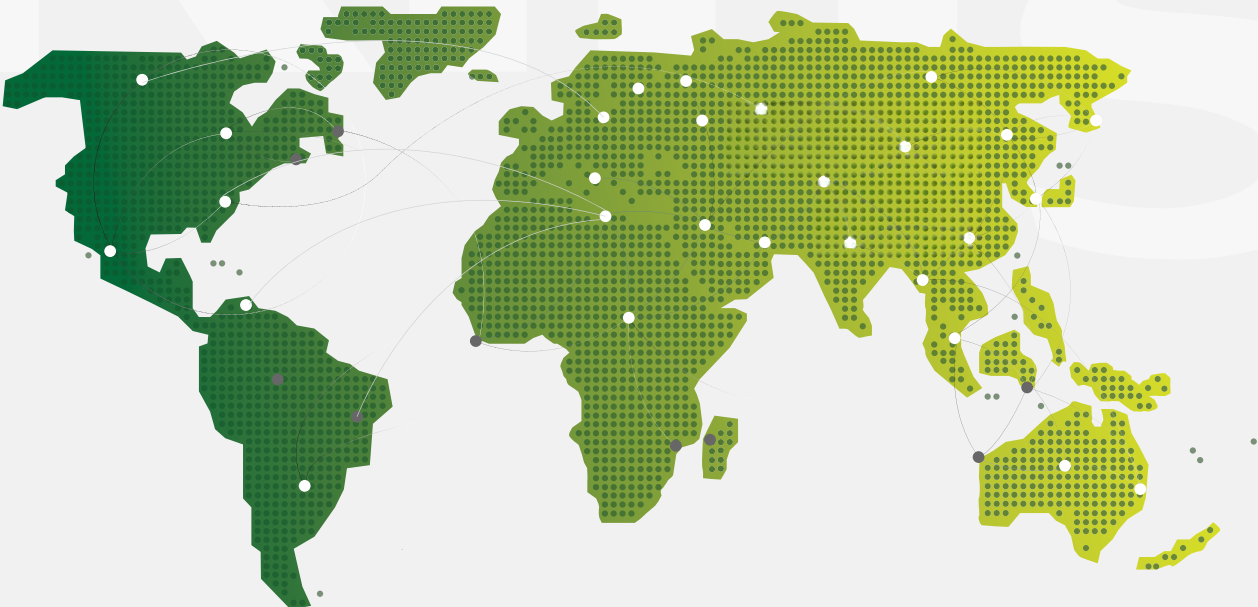

› Robust and resilient product design. With over 40 years' experience delivering high performing products worldwide, you know you can trust a Kingspan Titan TruckMaster.

SAVINGS

› Lightweight and portable storage solution means a faster and safer delivery of diesel fuel to any point of use, saving you valuable time and money.

SAFETY

› On-site safety is assured as fuels can be transported without the requirement of heavy steel drums or jerry cans, which are liable to spill.

ENVIRONMENTALLY
RESPONSIBLE

The TruckMaster meets all international diesel
transportation standards and ADR approvals ensuring
the safe containment of your fuel whilst protecting
the environment.

KINGSPAN TITAN
BUILT ON LEADERSHIP

KEY BENEFITS

GO ANYWHERE

The TruckMaster gives fuel delivery a new mobility.
With the efficiency of an oil tank in miniature,
it reaches places a tanker cannot go. Rough land,
building sites, narrow access points and farms offer
no problem to a TruckMaster.

IMPORTANT DESIGN FEATURES

The TruckMaster can be easily lifted with its
specifically designed lifting eyes or by using
a forklift. Additionally, the unique internal baffle wall
minimises fuel spillage when the TruckMaster is in
transit and all necessary fittings are stored neatly
under the lockable lid.

RELIABILITY

The TruckMaster comes with a 5 year guarantee
and 1 year on equipment - all supported by localised
customer service. We give you the confidence
and support over the lifetime of your product and
beyond.

NEW MODELS FOR EFFICIENT
TRANSPORTATION AND DELIVERY

The new TruckMaster 200 and 300 litres occupy
only half a euro pallet for more economical distribution
and reduced delivery costs.

Compact for
Euro pallet delivery

ENVIRONMENTAL PROTECTION

The specially designed area under the lockable
lid houses the TruckMaster equipment in a secure
leak-proof area. This eliminates the risk of dripping
fuel often encountered by an external retrofitted
nozzle and hose.
